- Beneath road surfaces or green spaces without need for valve vault
- CLEAN PUMPING (No odors, No gas, No screening of trash, No wet well, No periodic cleaning needed)

SIDINOX

Basic and advanced modules enable you to set up the configuration that meets your own requirements. Sidinox ranges from 4 to 8 ft diameter stainless steel (AISI 304L) sealed units which house all the equipment required for its operation. The SIDINOX can be fitted with DIP11-2HP up to DIP151-75HP duplex system. They are pre-assembled with pipework, valves, access ladder and vent. Provided with a fully functional electrical cabinet including the OmniDIP remote system and a base for external installation by contractor.

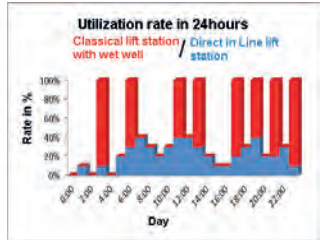

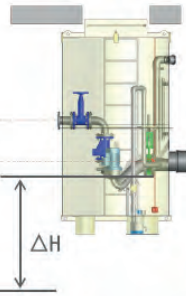

For the last 10 years SIDE Industrie has been innovating and developing the DIP SYSTEM® to make it not only the most COMPLETE, clean , safe and ecological solution but also extremely ECONOMICAL.

Let's compare a traditional pumping system with the direct in-line pumping DIP System® :

Traditional installation with wet well

Installation with DIP System®
