Remove Sewage Problems with **CRYSTAL CLEAR's MONKO®**

Crystal Clear Consulting
and Merchants (Pty) Ltd

It is well known that disease and smells from sewage in pit toilets and septic tanks is a major health concern for governments and a daily health problem for many people in areas without sewage treatment plants.

Adding **MONKO®** Bio-Treatment Powder, to Pit toilets and Septic tanks, has proved to be an effective way of totally removing the Health and Smell problems. Sewage plants benefit rapidly, with sludge reduction and improved final water quality.

MONKO® Powder

Over the past 25 years **MONKO®**, a natural and environmentally safe product, has been successfully used in all SEWAGE treatment systems.

MONKO contains **NO CHEMICALS**, only safe enzymes, which multiply and rapidly breakdown the sewage to harmless compost products.

MONKO has a **5 year** storage life when **kept dry**.

Real life projects in the field have proven this product to be harmless to the environment, while rapidly removing sewage problems.

MONKO Powder is the most convenient and cost effective way to solve Health & Hygiene problems caused from Pit Toilets, Bucket systems[®] and Septic tanks.

Packaging: **MONKO** is sold in 23 kg plastic buckets for re-packing into 100g or 500g bags for selling to users. One 100g bag treats a pit toilet for one month

Army Base in the Ugandan bush The Army General often complained of the smell blowing towards his tent from the nearby pit-toilet and requested that this be moved further from his office. 2 weeks later the General remarked to a colleague "thank you for moving that toilet" His colleague explained that the toilet had NOT been moved but that **MONKO** is now used to decompose the sewage and remove the smells. The General immediately wanted know more about **MONKO**.

Chief Morena T Lehana, Bisho,
Eastern Cape says:
"I have used **MONKO** in pit
toilets and wish to ensure that this
product is used in my areas to
improve the quality of life of the
