

*Re-start a sewage plant in
2 days using MONKO®*

OIL IN WATER BIO TREATMENT

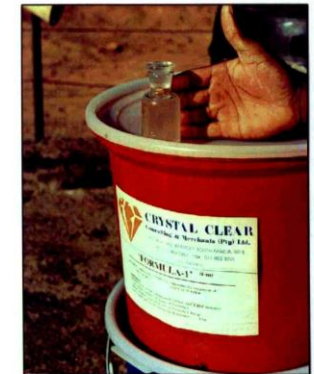

Bio-Treatment of oil/water in progress.

Drilling rig.

After 10 hours of aeration
(dissolved oxygen 8ppm).

Water after 10 hours.

PROJECT 1

*Oil in water
decomposed in
10 hours using MONKO®*

Climate Resilient - MONKO® Biotreatment powder:

- ▶ MONKO® recycles sewage, oils and other natural organics to compost by-products
- ▶ MONKO® Reduces sludge and blockages in septic tanks
- ▶ MONKO® Eliminates bad odours from all sewage activities
- ▶ MONKO® reduces pollution of rivers and damage to plants, algae
- ▶ & reduces CO₂ emissions
- ▶ MONKO® improves operation of all sewage plants by turbocharging the biological process including the Anaerobic, Aerobic & Facultative Aerobic stages

Natural enhancement of good biological processes for 30 years, by Crystal Clear

To Whom It May Concern

I am the COO and Co-Founder of Gozone Water Pty Ltd,

I specialise in, amongst others, sewage treatment,

I have utilised many other products in the time I have treated sewage, but after coming across Monko Powder from Crystal Clear, I have not turned back.

Monko Powder has allowed me to make sewage treatment plants a lot more effective by dosing Monko in to the aeration as well as the septic tanks associated to sewage treatment plants,

Monko powder greatly increased the plants ability to treat the sewage by adapting to the plant influent conditions and therefore I have excellent discharge results of the treated sewage,

I recommend Monko Powder to anyone in this industry, from oil spills, fats reduction and sewage treatment to name but a few,

If telephonic confirmation or reference is required,

Please do not hesitate to contact me,

Kind regards

Len Oort

Crystal Clear Consulting Pty LTD

Milton@crystalclear.co.za

Dear Milton

We here by confirm that over the past 3 years of using Monko-tm Bio treatment powder we have had great success in using the product in the following categories:

- On startup activation of a new GESS MBBR Sewage plant installation
- On treatment of 'clogged' septic tanks
- As a monthly maintenance treatment on our GESS MBBR Domestic Sewage plant
- The production has also assisted at the same time in reducing odor's and improving performance on older inefficient plants

Kind Regards
Barry Vorster
